-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 17 December 2007.

## **DETAILED ACTION**

### ***Allowable Subject Matter***

Removal of the term 'whereby' in claim 3, line 12 would render these claims allowable over the art of record. See below for a more detailed explanation.

### ***Response to Arguments***

Applicant's arguments with respect to claims 3-4 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dodd '931 in view of Ahrel. Dodd '931 in figure 7 discloses the basic refiner including bars having grooves. The bars of Dodd '931 are not arcuate which may decrease refiner efficiency. Ahrel solves this problem by disclosing similar apparatus including the use of arcuate bars. In order to render the apparatus more efficient, it would have been obvious for one of ordinary skill in the art to modify Dodd '931 by making the bars arcuate, taught to be desirable by Ahrel. The exact angle of the grooves on the bars would depend on several factors such as material being treated and desired flow characteristics. Note also that 'whereby' clauses are purely functional in nature and do not in themselves further limit the apparatus as claimed; in re Mason, 114 USPQ 127.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Rosenbaum whose telephone number is 571-272-4523. The examiner can normally be reached on Monday-Friday.
